Professional Summary

Motivated and detail-oriented B.Tech student specializing in Artificial Intelligence and Machine Learning with hands-on experience in Python, NLP, AI systems, and full-stack development. Skilled in developing ML-driven applications, data analysis, and cloud-based solutions. Seeking entry-level ML/AI opportunities to apply analytical and problem-solving skills in real-world projects.

Education

Amity University

Artificial Intelligence & Machine Learning B.Tech

2022 - 2026

CGPA: 7.52

Experience

Blockseblock | Blockchain Developer Intern

June 2025 - Aug 2025

- Implemented core social features and backend-first authentication using caller().
- Built and deployed an on-chain social network on ICP using Rust canisters and candid interfaces.

Skills

Programming Languages: Python, Java, TypeScript, Dart

Libraries/Frameworks: React.js, Node.js, Flutter, PyTorch, TensorFlow, NumPy, Pandas

Tools / Platforms: Git, Docker, AWS, Kubernetes, Postman, Streamlit

Databases: MySQL, PostgreSQL, MongoDB, Firebase

Projects / Open-Source

AI-Agent-System | Link

TypeScript, Python, NLP

Developed a multi-agent AI system to process emails, PDFs, and JSON data using NLP techniques
Built an intent classification model achieving 95% accuracy across categories (RFQ, fraud, complaints, etc.)

Automated task routing using modular agents, reducing manual effort by 60%

Integrated APIs and asynchronous workflows to handle real-time data processing

Trading Journal Mobile Application

Flutter, Firebase, Dart

Built a cross-platform mobile application with secure authentication (Google Sign-In via Firebase)

Implemented real-time database using Cloud Firestore for transaction tracking

Designed interactive charts for performance visualization using FL Chart

Improved user experience with offline persistence, caching, and smooth UI animations

Certifications

Front-End Web Development course - Udemy

Python Course Completion - GeeksforGeeks

Ethical Hacking - CISCO Networking Academy

Honors & Awards

Hosted a Freshman Induction Event with 200+ students, providing them with a structured coding roadmap

Organized and led a coding club for 1st-year students, encouraging peer learning and coding practice.

Conducted sessions for a Robotics club, combining knowledge sharing with fun and hands-on activities
